H. Reading Comprehension :

Running is excellent exercise. Before you start running, you should warm up first, using slow movements that make all your muscles work. But be careful! If you stretch when your muscles are cold, you might do yourself an injury. Always wear comfortable clothing and make sure your trainers (shoes) are in good shape. If you wear shoes that give good support to your whole foot, you will put less pressure on your knees. You should start exercising slowly, at a speed you can keep up for about 15-20 minutes.

It is ok if you sometimes go to bed late but if you regularly cut down on your sleep, it will soon start to have a bad effect on your skin. If you get a good night's rest, it will do your appearance the world of good. It is not called beauty sleep for nothing! Lack of sleep can cause acne or dry skin. Make sure you get a good night's sleep. Go to bed and get up at regular times. During the day, keep active: Get sufficient exercise so that you can sleep well at night.

Did you know that standing, sitting and walking badly can make you look heavier than you really are? If we watched the way we sat and stood, it would improve our appearance very much. Stand in front of the mirror with your feet apart and your legs straight. Pull in your tummy, check that your ears, shoulders, hips, knees and ankles are in line with each other. You should be feeling and looking better already!

	<p>For many years people have been trying to create a simple universal language that would serve all over the world as a common means of communication. In the last three hundred years, more than seven hundred such languages have been suggested. The most successful and the most popular of <u>these</u> is a language called Esperanto. It was invented by Ludwig Zamenhof, who lived in Poland. When he was growing up, he saw that people from different backgrounds who lived in Poland had lots of difficulties communicating with each other. This often led to disagreements. Ludwig felt that a common language would help them understand each other better and agree with each other. So he began working on a common international language. He started his work while he was still at school! In 1887, he published some information about his new language. He did not use his real name. He used the name Dr. Esperanto (which means "one who hopes"). Soon people from all over the world became interested in his language, called Esperanto. Today, Esperanto is spoken by about eight million people throughout the world. Many governments and international organizations recognize it in many ways. Esperanto is often used on radio broadcasts from official government stations.</p> <p>Questions:</p> <p>29. Who invented Esperanto?</p> <p>29. -----</p> <p>30. ۱۲	<p>Read the following passage and answer the questions that follow.</p> <p>A dictionary is a book which explains the meanings of words and expressions. You can find words easily because dictionaries put them in alphabetical order. The word 'dictionary' comes from the Latin 'dictio'</p> <p>('saying'). There are several types of dictionaries. Dictionaries which explain words and how they are used; dictionaries which translate words from one language to another; dictionaries of biography which tell about famous people; and technical dictionaries which explain the meanings of technical words. Dictionaries which explain what words mean give a clear 'definition' of them. A good dictionary also gives more information about words. For instance, it explains how they are pronounced. Usually the International Phonetic Alphabet (IPA) is used for this purpose. There are also dictionaries which translate words into other languages.</p> <p>Very often one volume translates both ways; for example, half of the book is from English to Persian and the other half from Persian to English. When using a dictionary to find out how to say something in another language, one has to be careful to choose the right meaning. A word like 'right' has several meanings in English, for example, 'correct' and 'the opposite of left'. A word like 'present' may be used as an adjective, meaning 'not absent', as a noun, meaning 'gift' or as a verb, meaning 'give'. Words with different meanings exist in other languages, too. A good dictionary lists all the meanings of words to help people find the meaning that they look for. A complete dictionary also tells you about the origin of words and the story behind them. For example, the words like 'pajamas', 'bazaar' and 'paradise' entered English from Persian.</p> <p>True or False?(۱p)</p> <p>۱. A word starting with 'p' appears before a word starting with 'm' in a dictionary. (.....)</p> <p>۲-Some dictionaries do not give users the meaning of words. (.....)</p> <p>Answer the following questions:(۳p)</p> <p>۱-Why can we find words in a dictionary easily?</p> <p>.....</p> <p>۲-What is the difference between technical dictionaries and biographical ones?</p> <p>.....</p> <p>.....</p> <p>۳-What is the origin of the word 'dictionary'?</p> <p>.....</p>		۴

C. Read the following passage and answer the questions that follow.

Chess is called the game of kings. It has been around for a long time. People have been playing it for over 500 years. Chess is based on an even older game from India. The chess we play today is from Europe.

Chess is a two-player game. One player uses the white pieces. The other uses the black pieces. Each piece moves in a special way. One piece is called the king. Each player has one. The players take turns moving their pieces. If a player lands on a piece, he or she takes it. The game ends when a player loses his or her king. There are a few more rules, but those are the basics.

Some people think that chess is more than a game. They think that it makes the mind stronger. Good chess players use their brains. They take their time. They think about what will happen next. These skills are useful in life and in chess. Chess is kind of like a work out for the mind.

You don't always have lots of time to think when playing chess. There is a type of chess with short time limits. It's called blitz chess. In blitz chess, each player gets ten minutes to use for the whole game. Your clock runs during your turn. You hit the time clock after your move. This stops your clock. It also starts the other player's clock. If you run out of time, you lose. Games of blitz chess are fast-paced.

Chess is not just for people. Computers have been playing chess since the 1970s. At first they did not play well. They made mistakes. As time went on they grew stronger. In 1997, a computer beat the best player in the world for the first time. It was a computer called Deep Blue. Deep Blue was big. It took up a whole room. By 2006 a cell phone could beat the best players in the world. Chess sure has come a long way. Don't you think so?

24. According to the text,is NOT a reason that chess is a good workout for the mind?

- Good chess players think about what will happen next.
- Good chess players take a lot of risks.
- Good chess players take their time.
- Good chess players use their brains.

25. Which best describes the main idea in Paragraph Four?

- It argues that players should think less.
- It explains how blitz chess is played.
- It explains time clocks work.
- It describes many different ways to play chess.

It is very important for us to respect our elders. It is also important to note that elders were not born elders; they were kids like us and now have grown old. A few years hence, we will also grow older. If today we respect them, our present and future generations will carry those values and will learn to respect us as well when we grow old.

Elders have a lot to share with us: their life experiences, their failures, their successes and many more. Thus, we need to care for them because they deserve to be cared for. Respect and care for elders start with our parents, as they are our first teachers in our life.

No matter what we do in our lives, who we are, and where we live, we must love them as they love us unconditionally. They feel honored when we appreciate their love and respect them. Therefore, it is our duty to help them when they need us because they are not young enough to handle things on their own like before.

The United States has been criticized* for the behavior towards its elderly citizens. Although in may other countries the elderly usually live with their children's family, many older Americans live alone, without the companionship of their children. This situation is sometimes blamed on the " selfishness " of the younger generation, but the closer look shows that many of the elderly prefer to maintain their independent lives.

Research on the situation of the elderly in America has shown that while grandparents are happy to be visited by their children and grandchildren, they prefer to continue living in the surrounding that are

familiar with. This suggests that children should allow their parents to live alone if they wish to, and should encourage them to maintain close ties to the rest of the family.

Another surprising result of the research on the elderly in the United States has been the very positive influence which pets have been found to have on the elderly people that they live with. It has shown that elderly people who care for small pets, such as cats or dogs, live longer, are healthier, and have better attitudes toward their lives than similar elderly people without these companions.

The mother asked her son quietly, "What is this?" The son replied: "It is a pigeon". After a few minutes, she asked her son for the second time, "What is this?" The son said, "Mom, I have just told you, "It's a pigeon, a pigeon". After a little while, the old mother asked her son for the third time, "What is this?" This time the son shouted at his mother, "Why do you keep asking me the same question again and again? Are you hard of hearing?"

A little later, the mother went to her room and came back with an old diary. She said, "My dear son, I bought this diary when you were born". Then, she opened a page and kindly asked her son to read that page. The son looked at the page, paused and started reading it aloud:

Today my little son was sitting on my lap, when a pigeon sat on the window. My son asked me what it was 15 times, and I replied to him all 15 times that it was a pigeon. Newborns sleep the most- a newborn baby sleeps between 17 and 18 hours a day, spending nearly half of that time in REM sleep (periods of eye movement during sleep). Both REM and NREM (nonrapid eye movement) sleep decrease with age, and by age five, children sleep between 10 and 12 hours a day spending about 20 percent of that time in REM sleep.</p> <p>The average young adult seems to need about 8 hours of sleeper night to function well enough during waking hours. Some people , however, sleep just 6 or 7 hours a night, while others need more than 9 hours to feel rested. Old people spend less time in deep NREM sleep , and their sleep is more easily interrupted.</p> <p>REM sleep amounts also vary across different animals, depending on the size of the animal and its level of development at birth. The size of an animal seems to affect the type of sleep it experiences – small animals generally spend more time in REM sleep. Animals , such as opossums and humans that are born in a condition in which they are unable to look after themselves or to do anything to help themselves, generally have more REM sleep as newborns than animals that can hunt, eat, keep warm, and defend themselves soon after birth, for instance horses. Even as animals age into adulthood, those born relatively immature continue to spend more time in REM sleep than animals that are mature at birth.</p> <p>38. A newly born baby spend about 8.5 hours in REM sleep. (T-F)</p> <p>39. The passage states that those who are likely to wake up more often during their sleep are</p> <p>a) adults b) children aged c) newborns d) old people</p> <p>40. What does paragraph 3 mainly discuss?</p> <p>41. How many hours do college students need to sleep?</p> <p style="text-align: right;">Good luck</p>

John got married six months ago, and like many young people these days, they are struggling to make a home at a time when the cost of living is very high. 3	<p>Text two:</p> <p>Read the following and answer the questions.</p> <p>Feeling tired ,nervous or angry? Take a deep breath. It's one of the most relaxing and energizing things you can do. Try taking a deep breath right now. Feel how new energy goes throughout your body. Breathing is a very easy, natural, and beautiful thing to do. It's really bad that most people do not know how to do it correctly!</p> <p>Correct deep breathing is a lost art, and breathing is the basis of all normal activities for all living things, for human beings it is the most necessary activity. It affects our health, our mental health and our lifespan, i.e. we can live longer if we know how to breathe correctly. Scientists believe that we can live without food for some days, but we can live only for a few minutes without air.</p> <p>Early man did not have to learn the art of correct breathing because of his lifestyle. Fresh air, a natural environment, continuous movement and a large variety of natural physical activities made early man a good breather. However modern man lives far from natural life and physical activity. And one of the prices modern man pays for civilization is anxiety and stress, probably the most important reason is: man has forgotten how to breathe correctly.</p> <p>51. The mother asked her son quietly, "What is this?" The son replied: "It is a pigeon". After a few minutes, she asked her son for the second time, "What is this?" The son said, "Mom, I have just told you, "It's a pigeon, a pigeon". After a little while, the old mother asked her son for the third time, "What is this?" This time the son shouted at his mother, "Why do you keep asking me the same question again and again? Are you hard of hearing?"

A little later, the mother went to her room and came back with an old diary. She said, "My dear son, I bought this diary when you were born". Then, she opened a page and kindly asked her son to read that page. The son looked at the page, paused and started reading it aloud:

Today my little son was sitting on my lap, when a pigeon sat on the window. My son asked me what it was 15 times, and I replied to him all 15 times that it was a pigeon. I hugged him lovingly each time when he asked me the same question again and again. I did not feel angry at all. I was actually feeling happy for my lovely child.

Suddenly the son burst into tears, hugged his old mother and said repeatedly, "Mom, mom, forgive me; please forgive me." Shopping used to be my favorite activity in my childhood. When I got a job in an office I carried on spending all my extra money on clothes-even after I had got married, bought a house and had children. In many cases, I bought the things which I didn't really need them! I realized I had a problem when my five-year-old daughter looked into my wardrobe and asked me why I had so many handbags. I counted them. I had twenty five handbags and actually they must have cost me thousands of pounds. I couldn't believe what I'd done!

First of all, I threw away my credit card. Then I gave away all the clothes that I'd never worn. After that I made arrangements every Saturday to visit friends or go on a day trip, So I wouldn't be able to go shopping.
